## TERMS and CONDITIONS OF SALE

**PRICES** are F.O.B. nursery at Painesville, Ohio. Any boxing or baling necessary is charged at near cost. Prices in this list are subject to market changes and cancel those in all previous price lists.

**TERMS.** 1% 10 days; net 30 days to those having established credit with us. Cash orders receive 2% off. Be sure to include enough to cover packing, so as to eliminate C.O.D. costs. Overpayments returned promptly. C.O.D. orders must be accompanied by at least 1/3 of the amount of the order.

**CLAIMS** for rejections, shortages, or other reason will be entertained only if made within 5 days after arrival of goods.

**GUARANTEE.** We guarantee all stock to be true-to-name and free of injurious insects or disease. All goods travel at consignee's risk; we assume no responsibility after they leave the nursery. It is mutually agreed that in no case shall we be held liable for a greater amount than the purchase price of any item.

**SHIPMENTS.** Please state routing of your shipments and method you prefer. Where no instructions are given, we will ship according to the situation, as we think best serves your interest.

# SHADE & ORNAMENTAL TREES

Cole's has long been known for producing the finest in trees for all markets. Continuous research for improved varieties and production methods has resulted in our present leadership in this field. Planted in seven-foot rows, our trees have ample room for proper development of root, body and top. Because all digging and root-pruning is done mechanically, you benefit by a **vastly superior root-system** and consequent transplanting success.

## NOTES

The size immediately following the name indicates approximate height at maturity, in cultivation.

Where an item is usually moved with a ball of earth, we indicate the recommended B&B size after the listing, thusly: (4 to 5 ft. 15" Ball), and the price includes balling charges. Should earth balls be desired on other items, prices and weights are listed on page 48.

Although caliper listings of trees are also indicative of top development, we imply no relationship of this measurement to height. This is entirely subject to differences in variety and cultural practices.

# NEEDLE EVERGREENS

Cole's evergreens are properly spaced and sheared to produce dense, symmetrical, colorful specimens. Our light soils produce a naturally fibrous root system that assures successful transplanting. All can be shipped outside the Japanese Beetle Zone.

Prices include a definitely superior job of balling, burlapping and securely rope-tying roots.

Approximate ball sizes are given for your guidance in estimating shipping weights. See inside back cover for ball weights.

## TRUCKING

During planting season, our trucks make frequent deliveries to Cleveland, Columbus, Cincinnati, Detroit, Buffalo and Pittsburgh areas. Trucking can easily be arranged to other cities within 500 miles of Painesville. Rates reasonable.

# *America's Newest Tree Sensation*

# "SUNBURST*" LOCUST

**Plant Patent No. 1313**

The first new color in a hardy, ornamental shade tree in decades. Bright golden foliage on 8 to 10 inches of branch tips, contrasts with the rich green of the balance of the tree; appears to be in bloom all summer.

- Broadly pyramidal head and excellent branching habit creates a beautiful symmetry unmatched by other honeylocusts.
- Producing only male flowers, Sunburst is absolutely seedless and causes no ground litter.
- Sunburst has been planted from coast to coast, is adaptable to any location and transplants easily. Unusually strong, it has withstood ice and snow storms which completely ruined neighboring trees of other varieties.
